REVIEWER REPORTS

Reviewer Comments:

Reviewer 1

The article is worth publishing. It discusses unique phenomena (i.e., cross-religious ritual practices) rarely discussed in the previous academic literature. Specialists of the Maluku society also tend to neglect to analyze this issue. The data presented in the article are also original, drawing from first-hand informants.

I have some suggestions to strengthen the article as follows.

I'd suggest changing the title, e.g., Cross-Religious Rituals in the Moluccas, Indonesia.

The introductory section should describe briefly the article's focus, objectives, and significance

The interview section should also demonstrate the previous/existing literature on the studies of Maluku's religious engagement or ritual practices in this region, and describe the article's novelty, academic (theoretical or practical) contribution, and differences from other existing studies.

References to other cross-religious ritual practices in Ambon or the Moluccas, in general, will be good to be added. I saw there are some similar cases of inter-religious ceremonies between Christians and Muslims in Maluku.

Some statistical data on the Christian & Muslim populations in Maluku/Ambon will be good to be presented since not all readers are familiar with Maluku

I think a brief presentation on the previous Christian-Muslim violence will be useful to understand whether cross-religious ritual practices in Maluku are a new phenomenon or had taken place before the communal riots in 1999. If recently, why now? Kinship ties had long been practiced in Maluku.

Use the terms "civil pluralism" or "civic pluralism" consistently. Also, the author should differentiate between "pluralism" and "plurality" (in the Introduction).

Reviewer 2

This manuscript is very interesting and has potential to provide insights into how cross (inter?) religious tolerance and understanding is built in an area with a history of religious conflict. The descriptive and visual data also show that the authors have carried out quite extensive fieldwork. However, the article was difficult to read for three main reasons:

- 1) Language – language editing would increase the readers' understanding of the text. I have pointed out in the paper examples of sentences that I do not completely understand (I would say that I made assumptions about what is being said, but I am doubting whether that is what the authors are suggesting).
- 2) Structure of the writing and the complexity of ideas – many ideas or concepts are thrown into one paragraph, transition sentences or paragraphs are lacking (for example see my comments on page 2 in the introduction and page 3 in the literature review).
- 3) Use of local terms without elaborate explanation (see for example my comments on *pela basodara/pela gandong*, *bakudapa* etc).

The three points above being said, I would advise a rewrite of the manuscript in order for the reviewers to understand the substantial parts of the manuscript.

Another point the authors need to bring out in this article is the context. Being an article about cross (inter?)religious relations means that more needs to be said about the history of inter religious conflict in the Mollucas – especially considering that not all readers are familiar with the Mollucas.

My last point is on methods: more needs to be said about how the research was done, and reflection of the author's own position (especially in relation to his/her own religion) is essential.

Dear Dr sulaeman,

Thank you for your recent submission to Human Arenas, which you began on 19 January 2023 UTC. Please note that this submission is not yet complete.

<https://submission.springernature.com/submission/cf53bd3f-5551-46cf-a26c-574fedf379ea>

IMPORTANT: before completing your submission please check and ensure that your manuscript is formatted according to the submission guidelines (<https://www.springer.com/journal/42087/submission-guidelines>), and adheres to relevant editorial and publishing policies.

All manuscripts are subject to an initial Technical Check. Failure to adhere to our submission policies will result in the manuscript being returned to you before being sent to an Editor.

Common reasons for a manuscript to fail the initial Technical Check include:

- Contributing author details not added to the online submission system
- Papers reporting experiments on live vertebrates and/or higher invertebrates missing statements of approval, accordance and (for human subjects) informed consent
- Lack of appropriate permission and/or credit for reproduced images

Please note a recent change to our competing interests policy: specifically, the definition of 'competing interests' has broadened to include financial AND non-financial interests (details of our Editorial Policies and guidelines are available here: <https://www.springernature.com/gp/policies/editorial-policies>).

When submitting your revised paper, please can you ensure this statement refers to 'competing interests' and, if applicable, also list any non-financial competing interests as outlined in our editorial policies? Please note that the Competing Interests statement on the system must match the Competing Interests statement provided in the article file.

Please contact us if you have any questions or require any assistance.
